

Teacher Education and the Changing Demographics of Schooling

15 March 2016
 9.30am - 3pm

Edinburgh Centre for Carbon Innovation, High School Yards,
 Edinburgh EH1 1LZ

Preparing teachers for the changing demographic of schooling as reflected in the increasing diversity of students in today's schools is a key concern among teacher educators, the teaching profession and policy makers. This conference presents a synthesis of the recently concluded seminar series *Teacher Education for the Changing Demographics of Schooling*. Drawing on research from a range of areas addressing different diversity areas, approaches to teacher education and the ideals of inclusive education, the conference aims to promote discussion among key stakeholders and articulate a framework for further research in the field.
